- Design & Analysis of Data Structures & Algorithms - Requirements Engineering
- Enterprise Systems Development
- Ethical and Professional Issues in Computing & Digital Media

Coleg Gwent
BTEC Extended Diploma in IT
Level 3
2011 – 2013

Personal Projects

Forkify

A recipe web app designed using vanilla JS. It fetches data from an external API and manipulates the DOM elements to output results onto an HTML page. Relies on both Event Handling and use of Objects; as users can change the measurements of each ingredient by dynamically specifying the number of servings needed.

Pentagon

A mockup version of local insurance broker's landing page built using the Bootstrap 4 framework. It's a responsive application via the use of Bootstrap Grid and Media Queries. It also possesses internationalization features by containing a translation to Welsh toggle button.

Printed Threads

An e-commerce web app built using React/Redux & React-Hooks. It also utilizes Firebase for User Registration, Authentication and Data Persistence along with StripeJS to handle payments through a basic Express backend server.

Soft Skills

Communication
Eagerness to Learn
Adaptability
Decision making
Organised
Time management
Ability To Work Well Under Pressure
